

# Istation Books and Passages

**Istation's** interactive reading curriculum uses books and passages to support reading instruction for each teaching cycle. Istation's instructional texts have a readability measure determined by [The Lexile® Framework for Reading](#) that represents each text's difficulty on the Lexile scale. Each Istation cycle provides appropriate texts for students' abilities, as measured on the Istation's Indicators of Progress (ISIP™) assessment.

Students receive a Lexile reader measure through the comprehension subtest of the ISIP assessment. This measure helps match readers to texts within their instructional or independent reading ability. It is important to note that many Istation books are meant to be read aloud and therefore may be beyond a student's Lexile measure even though the book was encountered in the Istation curriculum. These books can be enjoyed through shared reading with a more proficient reader. All books and passages listed are available for download in Istation's Teacher Resources at [istation.com](http://istation.com).

Although Istation does not link directly to grade levels, it is possible to estimate the grade-level correspondences to Lexile measures of texts encountered in the Istation curriculum. The chart below shows Lexile text measure ranges for Istation texts and the approximate grade-level correspondence.

Lexile Range	Approximate Grade Level
BR60L – 450L	K
20L – 570L	1
200L – 810L	2
480L – 810L	3
580L – 940L	4
750L – 950L	5
800L – 1000L	6
975L – 1100L	7
1050L – 1175L	8+
